HOMES AND BUILDINGS STAND OUT AND INCREASE THEIR VALUE WITH THE ECONOMICALLY PRICED JUNIOR H-F™ STEEL ROOFING PANELS.

Designed for residential and commercial buildings, our **Junior H-F™ steel roofing panels** give them the attractive traditional style and appearance of classic buildings with standing seam roofs and higher market value.

Our **Junior H-F™ panels** are manufactured from .016" thick (29 Gauge) Galvalume pre-painted steel in 16" (406 mm) width. They are pre-punched for screws with nylon washers allowing for adjustment to the natural expansion and contraction of the steel. They are coated with a high quality Perspectra PLUS Series™ / WeatherXL™ paint whose quality and performance specification offers 40 years of film integrity. They are available in several trendy colours reflecting the sun's ultraviolet and infrared rays and reducing the heat island effect in compliance with LEED® credit requirements. Our **Junior H-F™ panels** can be curved on site over a convex solid backing roof with a minimum radius of 16 feet.

Once installed on a solid backing, our **Junior H-F™ steel roofing panels** are secured with hidden fasteners.

*STIFFENER RIBS CAN BE
REMOVED UPON REQUEST

Striations add strength and rigidity to the panels and stiffener ribs can be removed upon request. Recent new technology breakthroughs and product design allow us to manufacture our **Junior H-F™ steel roofing panels** while maintaining our limited 40-year transferable warranty.

- **Steel roofing panels from the same family as our prestigious Heritage Series**
- **In the traditional style and appearance of standing seam roofs**
- **Easy installation: no clips and no seamer necessary**
